REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Applicants claim, among other things, a combustion apparatus for NOx reduction by suppressing temperature of combustion gas derived from a burner, including NOx reduction means having an excess air ratio versus NOx characteristic that generated NOx value decreases with increasing excess air ratio of the burner, and an excess air ratio versus CO characteristic that exhaust CO value increases with increasing excess air ratio, and excess-air-ratio control means for controlling the excess air ratio of the burner to air ratio, a specified excess wherein the excess-air-ratio control means includes outside-air temperature detection means and controls the excess air ratio to the specified excess air ratio based on a detection signal derived from the outside-air temperature detection means.

The prior art of record, taken alone or in combination therewith, does not disclose nor make obvious the combination as claimed by applicants.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably Application/Control Number: 10/622,460 Page 3
